## Education

2019 - 2023  
**B. Tech in CSE**  
Lovely Professional University,  
Punjab,

2017 - 2018  
**Secondry School**  
RSM Public School

## Skills

- Programming Languages:**  
JavaScript , C++, Java
- Web Development:**  
Node.js, Express.js, HTML, CSS
- Databases:**  
Sequelize, Mongoose
- Frontend Development:**  
Basic knowledge of React.js
- APIs and Libraries:**  
Twilio, Delhivery, Stripe

## Language

English, Hindi

# PRINCE KUMAR

## Nodejs Developer

Passionate and meticulous graduated with a B.Tech in Computer Science Engineering, specializing in Node.js development. Experienced in creating innovative projects from scratch using Node.js, JavaScript, and various third-party APIs. Proficient in developing scalable web applications and integrating backend services. Strong problem-solving skills and a passion for delivering high-quality code.

## Work Experience

### Promatics Technologies

2023(March) - Present

#### Nodejs Developer

- Assisted in the development of web applications using Node.js and JavaScript.
- Collaborated with team members to design and implement new features and enhancements.
- Conducted a session on Node.js, providing an overview of Node.js concepts and best practices to new joiners.
- Conducted code reviews and provided constructive feedback for improving code quality.
- Utilized version control systems like Git for code management and collaboration.

## Projects

### KVS Social And Market Place

- Developed a business application similar to Instagram, allowing users to post their business requirements, follow other users, like and comment on posts.
- Implemented features such as user profiles, notifications, and a news feed.
- Utilized Node.js, Express.js, and MySQL for backend development.

### Tavern

- Built a party application enabling users to create groups, communicate, and organize events and games within the group.
- Integrated location-based services to display surrounding events and user-created stores within a specific radius.
- Implemented various features using Node.js, Express.js, and MySQL.

### Get Real

- Created a artist platform for promoting local artist.
- Developed a system that enables users to invite artists within a specified radius, coupled with a notification mechanism for GPS-based alerts when the user is not within their designated base location.
- Integrated third-party APIs such as Twilio for sms and firebase ntification.
- Utilized Node.js, Express.js, and MongoDB for backend development.

## Projects in React.js

- Developed some basic projects in React.js, including a To-do List application and a gym fitness application.
- Gained hands-on experience with React.js components, state management, and routing.
